LASIK BENEFIT PLAN

for Cummins Employees/Families

Cummins Employees Will Enjoy:

- Complimentary LASIK Consultation w/the surgeon
- \$1500 OFF (\$750 per eye) our Premium LASIK Package (normally \$2,445 per eye)
- \$0 Down, 0% Financing for 12 months
- Automatic enrollment in our Lifetime Vision Advantage program

Part of our Community Outreach Program

Leading eye surgeon Michael Pankratz, M.D. and the eye care professionals of The Pankratz Eye Institute are proud to extend our LASIK Benefit Plan to all Cummins, Inc. employees, their spouses and family members.

The plan extends \$1500 off (\$750 per eye) our Next-Generation CustomVue VISX® LASIK and PRK procedures. Since our method of LASIK is also a covered and approved procedure under your Flex Medical Spending Account or Health Savings Account at work, you can combine those tax-free savings with your LASIK Benefit Plan. Contact your HR representative to find out more.

How To Enroll In Our Benefit Plan

Enrollment is simple for Cummins employees, spouses and family members;

- Call (812) 373-7777 to schedule your free LASIK consultation
- Provide the Cummins employee name and unique employment ID number

Lifetime Vision Advantage Program

As we age, our vision changes and may not be as clear and crisp as it was after first having LASIK. At PEI, we stand by our promise of great vision after LASIK with our Lifetime Vision Advantage program that covers the need for an enhancement should the situation arise, and it is deemed medically appropriate by your surgeon. Enrollment is automatic after having LASIK surgery with us. To maintain your status in the LVA program, yearly eye exams are required with any eye care provider in the country.

About Our VISX Laser Technology

Our LASIK technology features CustomVue iLASIK, a wave-front guided all-laser procedure with the potential to give patients a higher quality of vision than glasses or contacts. CustomVue iLASIK is the same technology endorsed by the U.S. military and NASA.

WaveScan aberrometry is used to diagnose and capture unique imperfections in your eyes that were undetectable through traditional methods. This digital information - which is 25 times more precise than standard measurements for glasses or contacts - is then transferred directly into our VISX laser, enabling your surgeon to tailor a distinct correction for your eyes only. Businesses love our method of LASIK because it allows their employees to enjoy a more rapid visual recovery and the ability to return to work only 24 hours following their procedure.

Restrictions apply and vary by work environment, but most patients are able to return to most normal daily activities the day following their procedure.

Setting New Standards in LASIK Technology

The Pankratz Eye Institute surgeons are among the most experienced in the country having performed thousands of refractive surgeries over the last 20 years. This makes us the perfect destination for LASIK or PRK. We are committed to helping you enjoy a lifetime of the best possible vision by customizing a surgical vision plan based on your individual needs and lifestyle.
